

Go-live checklist

Run through this before switching the store to live traffic.

Page 1 of 2

BUCKAROO

paying attention

1 Credentials and connection

- ☐ Live **Store key** and **Secret key** entered in Magento, for every store view
- ☐ **Buckaroo's push IPs and ports are allowlisted** on your firewall or WAF.
See Push messages for the current list
- ☐ Store is publicly reachable over HTTPS with a valid certificate
- ☐ Plugin routes are excluded from Varnish, your CDN and any full-page cache
- ☐ Store is not behind basic authentication
- ☐ *Optional:* push failure emails in Plaza (Settings → Stores → Push settings → E-mail push failure).
Useful for the first days after launch, though it also emails on failures that later succeed on retry

2 Payment methods

- ☐ Every method you intend to offer is set to **Live**, not Test
- ☐ **No method is left on Test**
- ☐ Every method also has an active Buckaroo subscription in your account.
You can check this in the Buckaroo Plaza
- ☐ Method-specific onboarding is complete: Apple Pay domain verification, PayPal onboarding, BNPL provider onboarding
- ☐ Sort order matches how your customers actually pay, based on popularity, for example by country
- ☐ Country and customer-group restrictions are correct per store view

3 Configuration

- ☐ Transaction label is set and recognisable on a bank statement
- ☐ Invoice handling matches your fulfilment process
- ☐ Refund settings match your operational process
- ☐ Order status mapping reviewed if you changed the defaults
- ☐ *Optional:* payment fees, if used, are configured on the right methods and taxed correctly

4 Store health

- ☐ Magento **cron is running**. Check it, don't assume it
- ☐ Plugin is on the latest version
- ☐ Store is in **production mode**
- ☐ **Debug logging is turned off**
- ☐ **Penny tests done** for every method you can pay with yourself: correct order status in Magento, invoice created, and refunded afterwards

5 After go-live

- ☐ Watch the first day of orders for anything stuck in Pending payment
- ☐ Confirm settlement appears as expected in Plaza
- ☐ *Optional*: subscribe to Buckaroo status updates for incidents and maintenance
- ☐ *Optional*: subscribe to plugin releases on GitHub. Open the repository, select **Watch** → **Custom**, tick **Releases** and save.
New payment methods, scheme changes and security fixes all arrive this way, so it's worth knowing when one lands. See Releases and upgrading

Contact details

Do you have any questions? Please contact us by telephone from Monday to Friday from 8.30 a.m. to 5.00 p.m.

For general questions please contact our Merchant support department (select option 2; your access code is in Plaza under Contact details) or call us directly:

📞 030-7115020 / 030-7115000 ✉️ wecare@buckaroo.nl

For product or service inquiries, please contact our sales department via:

📞 030-7115010 ✉️ commercialcare@buckaroo.nl

For technical issues, please contact our technical support department via:

📞 030-7115050 ✉️ support@buckaroo.nl

In case of an (unannounced) technical emergency outside office hours, please contact us via:

📞 030-7115099 / 06-81386583

Our knowledge base brings together all Buckaroo support and development information — FAQs and full integration/API documentation.
