

Go-live checklist

Run through this before switching the store to live traffic.

BUCKAROO

paying attention

1 Payment methods

- ☐ Credentials filled in and verified, on **every** sales channel you sell through
- ☐ Every method you intend to offer switched to **Live**, one by one
- ☐ Every method you do not intend to offer left disabled
- ☐ Methods assigned to the right sales channels
- ☐ *Optional:* Apple Pay Guid filled in, if you are offering Apple Pay
- ☐ *Optional:* Google Pay merchant IDs filled in, both of them, if you are offering Google Pay
- ☐ *Optional:* PayPal Express using your live merchant ID rather than the sandbox one

2 Configuration

- ☐ Capture on shipment tested, if you rely on it
- ☐ Order state settings checked against your own processes

3 Store health

- ☐ Plugin is on the latest version
- ☐ Store is in **production mode**
- ☐ **Penny tests done** for every method you can pay with yourself: correct order status in Shopware, invoice created, and refunded afterwards

4 After go-live

- ☐ One small real payment placed, captured if applicable, and refunded
- ☐ Watch the first day of orders for anything stuck in Pending payment
- ☐ Confirm settlement appears as expected in Plaza
- ☐ *Optional:* subscribe to Buckaroo status updates for incidents and maintenance
- ☐ *Optional:* subscribe to plugin releases on GitHub. Open the repository, select **Watch** → **Custom**, tick **Releases** and save.
New payment methods, scheme changes and security fixes all arrive this way, so it's worth knowing when one lands. See Releases and upgrading
